

CRC Activation Management Structure

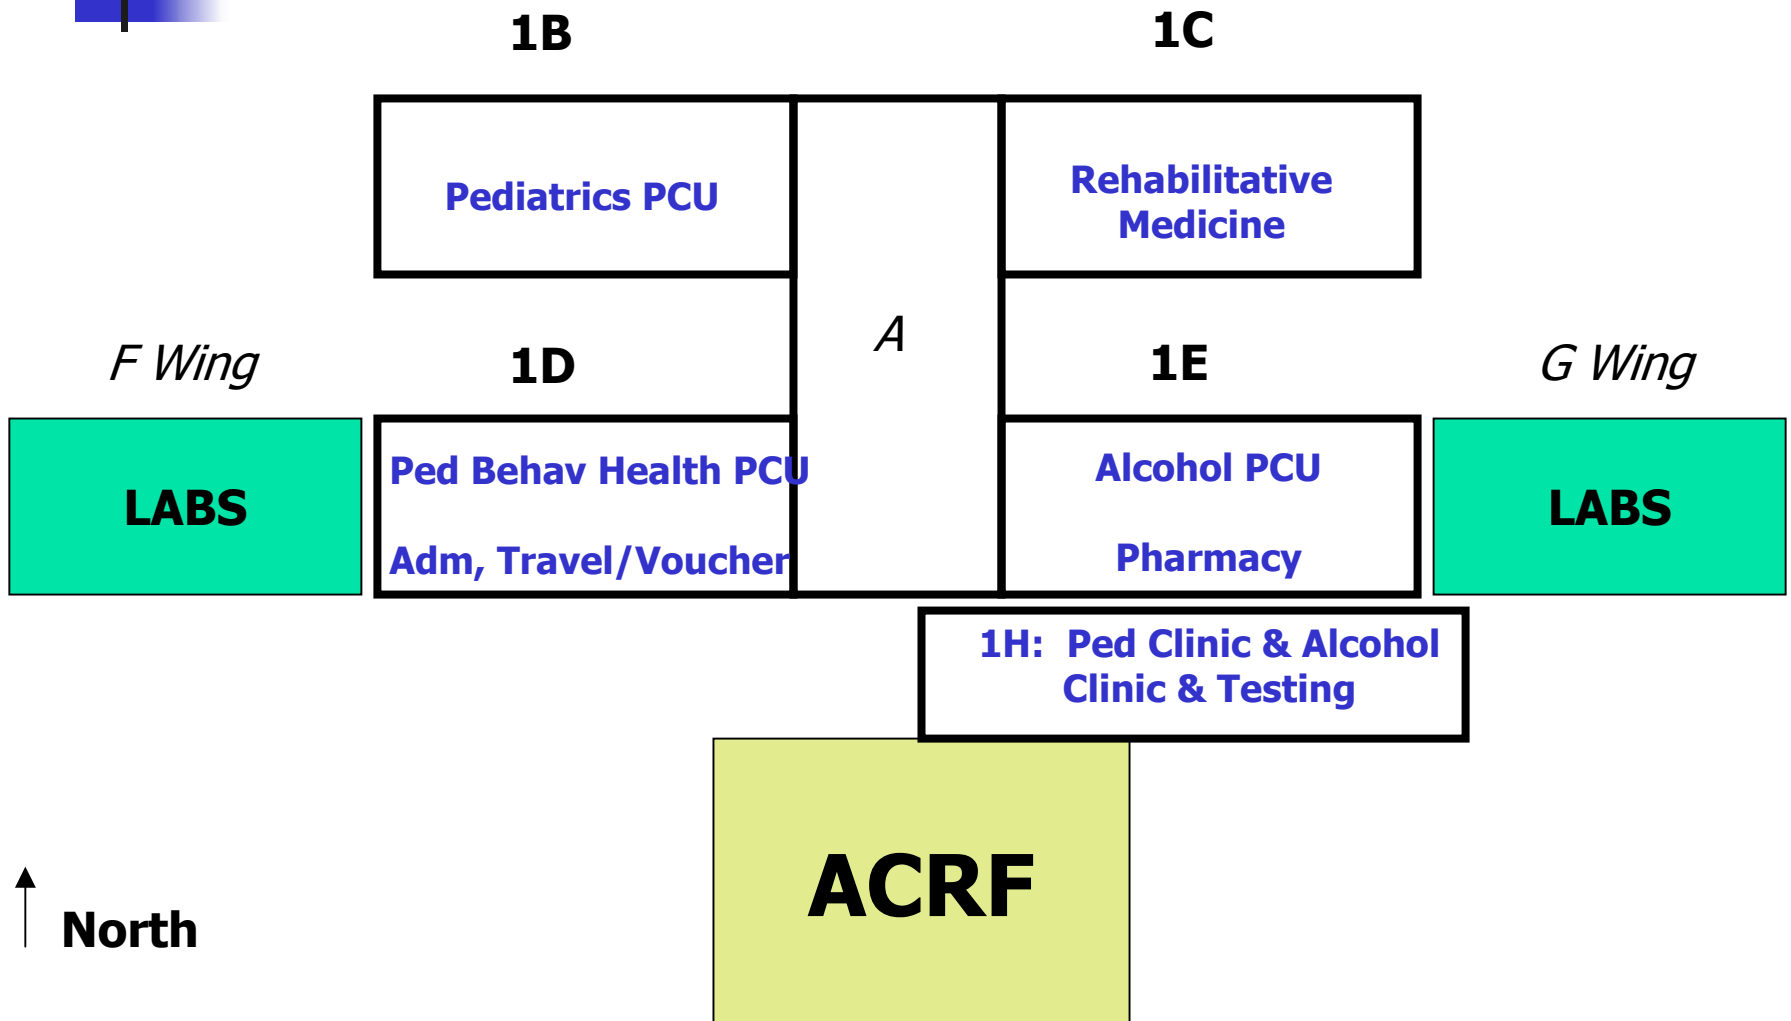

Floor Plan Highlights

- Patient Care Units on 1st, 3rd, 5th, and 7th floors
- Interstitial space for mechanical, electrical, plumbing and communications on 2nd, 4th, and 6th floors
- Offices and Conference rooms on 2nd, 4th, and 6th floors in the A sectors and 'knuckle' (end) areas

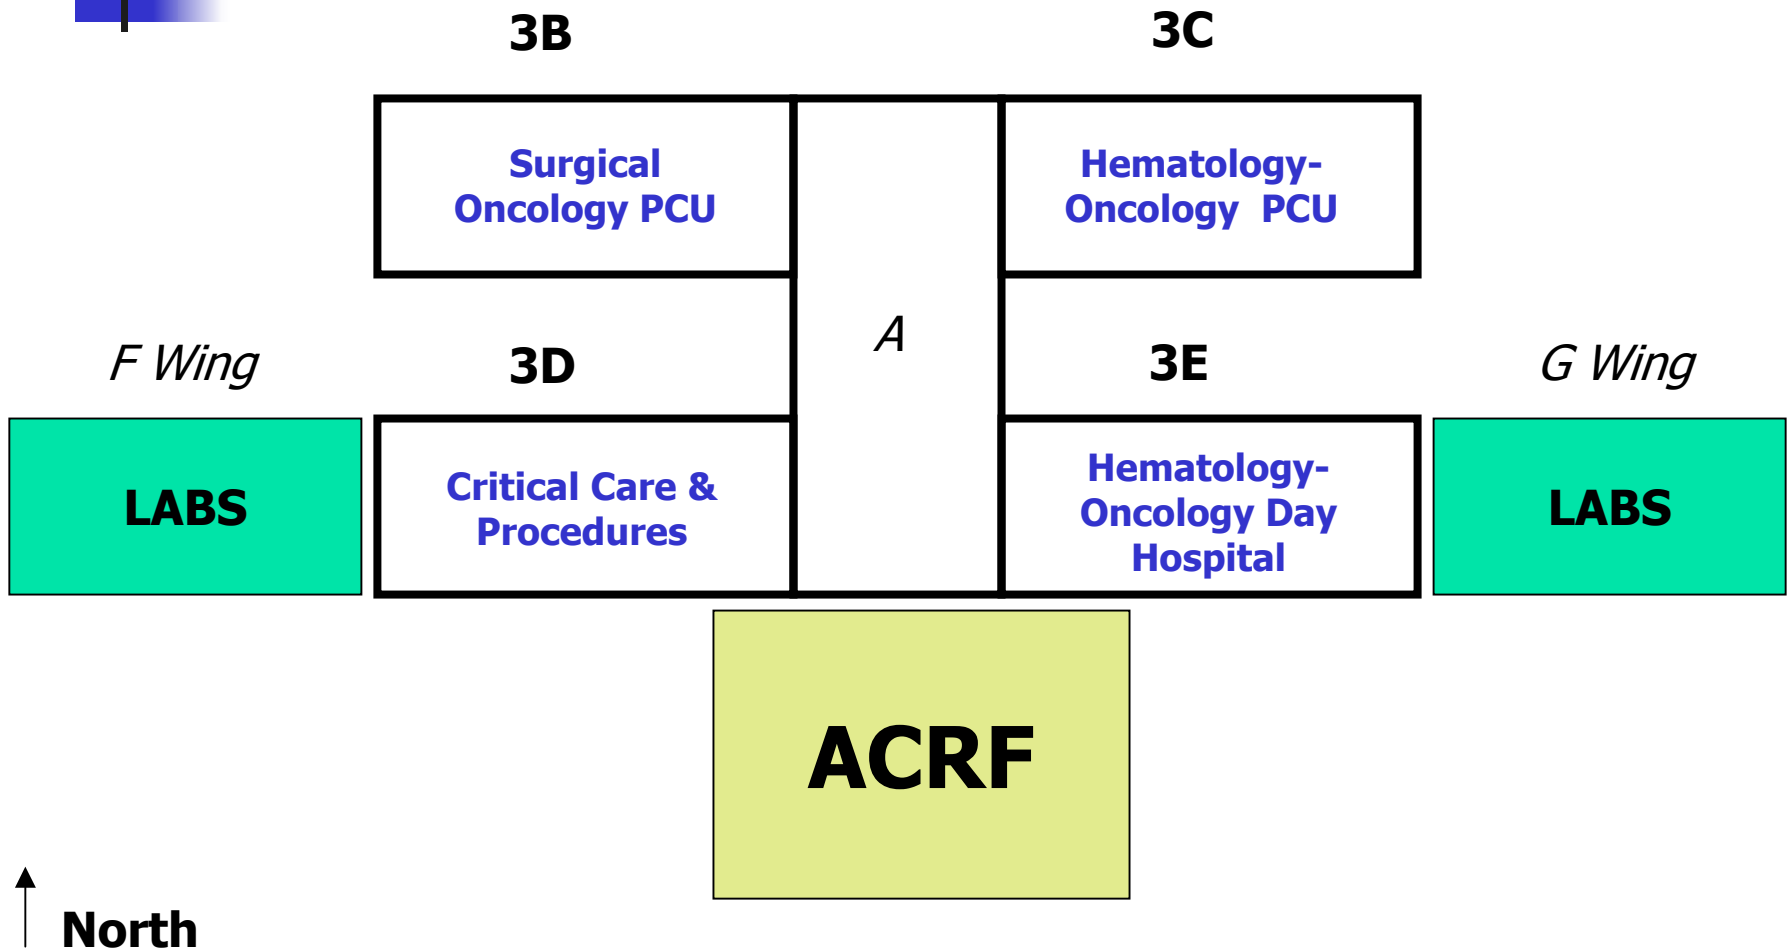

Overview of 1st Floor Plan

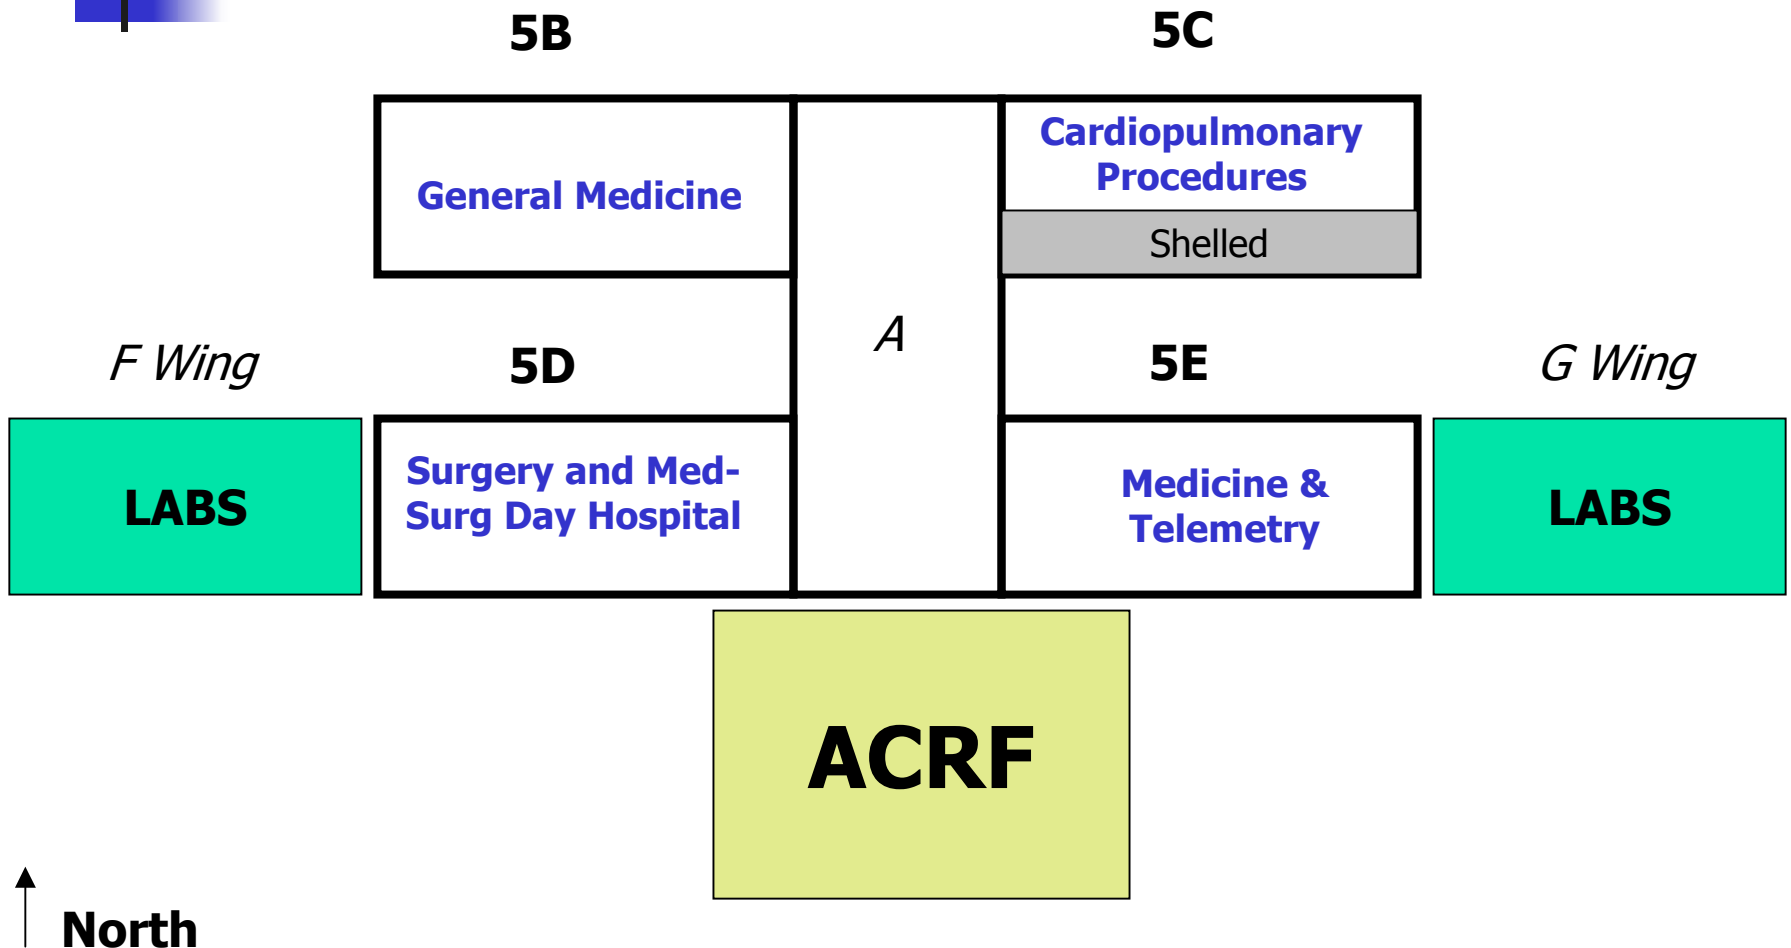

Overview of 3rd Floor Plan

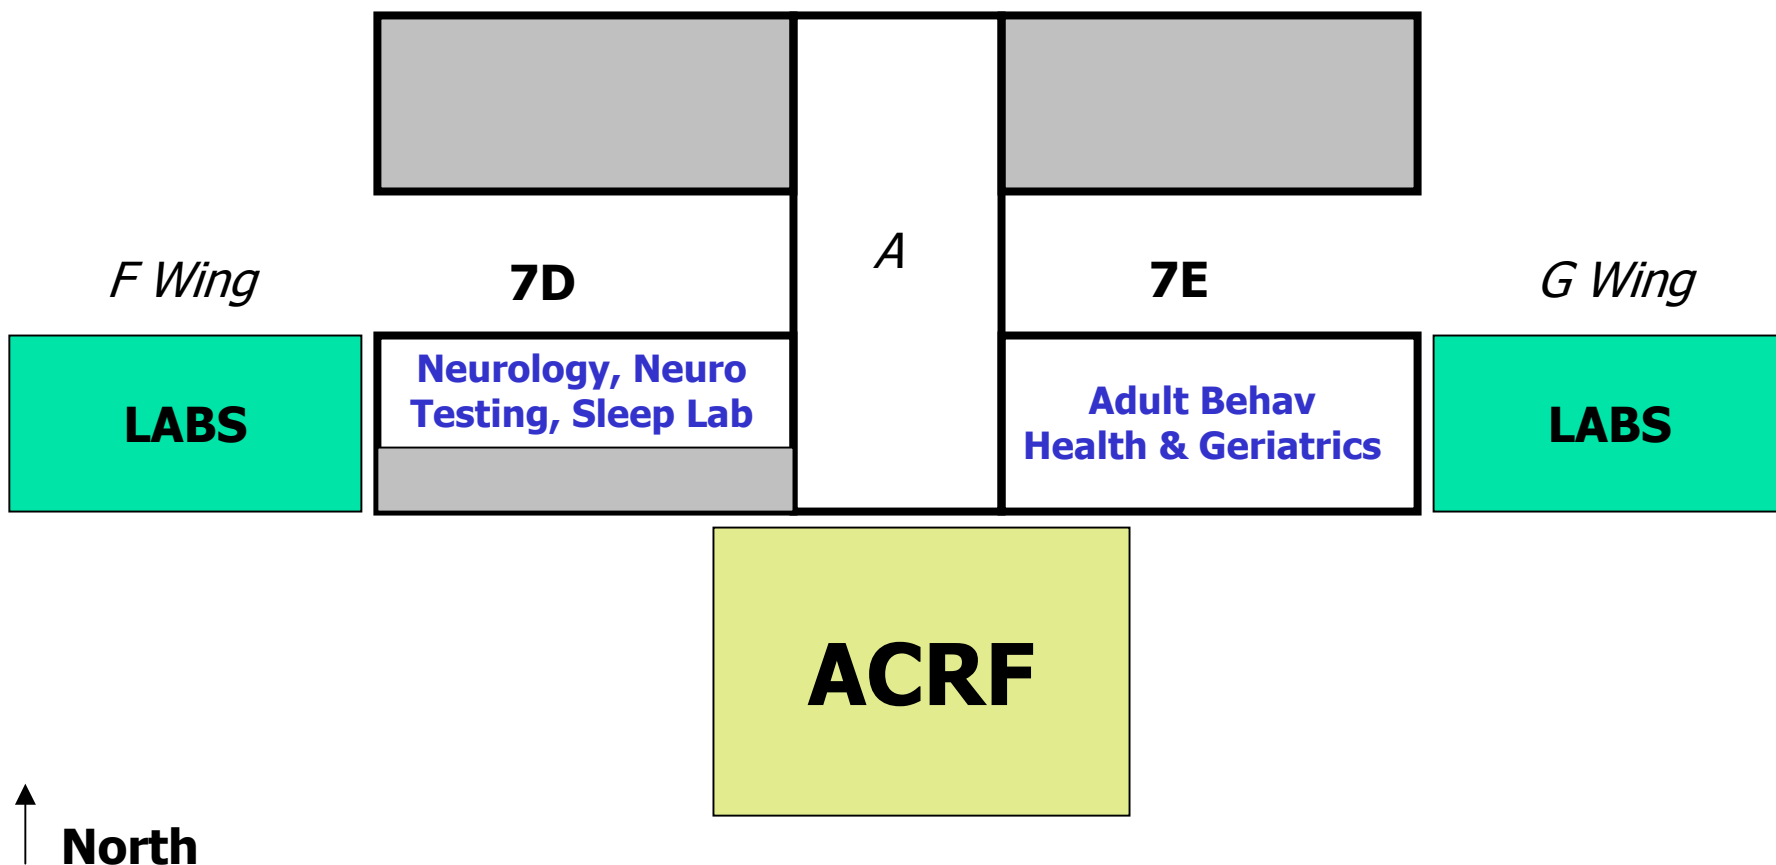

Overview of 5th Floor Plan

Overview of 7th Floor Plan

Recent Key Activities

- 14 User Group Meetings to review floor plans
- Validated patient care unit and departmental equipment needs
- Selected furniture for patient care units and public space

Challenges Associated with CRC

- Design creates operational challenges in providing services due to increased travel distances
- Changing philosophy from “Institute” patient care unit to “patient population” unit
- PCU have multiple nursing stations rather than one

Challenges Associated with CRC

- Integration of new technology
- Adjacency of respective clinics to patient care units
- Impacts of Building 10 Revitalization
 - connectivity
 - Cafeterias
 - Departmental Relocations
